## FCBAG MODULE

# CONTENT

## FCBAG MODULE PROTOCOL (MODBUS)

Page

a)	Modbus Configurations	2
b)	Modbus Communication Protocol	3
I.	Function Code	3
II.	Read Input Register (0x04)	3
III.	Read Holding Register (0x03)	8
	Preset Single and Multiple Register (0x06 and 0x10)	8

## MODBUS CONFIGURATIONS

Dip Switch	Pin	Function	OFF	ON
DIP_Config	1	Modbus	Disable	Enable
	2	Baud Rate	9600bps	19200bps
	3	Stop Bit	1 (Parity)	2 (non-Parity)
	4	Parity*	Even	Odd
	5	Reserved	Disable	Enable

\*Parity setting will enable when Stop Bit is set to OFF (Parity).

# MODBUS COMMUNICATION PROTOCOL

## I. Function Code

Function Code	Description	Remarks
0x03	Read Holding register	-
0x04	Read Input Register	-
0x06	Preset Single Register	In case PCB does not function correctly, ensure FCBAG software does not force to send command function code 0x10 in replacement of function code 0x06 on protocol setting.
0x10	Preset Multiple Register	Function code 0x10 <b>must</b> control more than 1 address in one single command.

## II. Read Input Register (0x04)

32003

**Indoor Unit Set Temperature**

A) Set Temperature

\* Temperature value in Decimal multiplies with 10. Eg: 18°C x 10 = 180.

32004

**Error Code**

A) Error code lower mapping value (0-15)

B) Error code upper mapping value (0-31)

C) Malfunction

0: Normal

1: Malfunction

\*\*Representation of Error Code:

Error Code type	B) Error Code higher mapping value (hex)	A) Error Code lower mapping value (hex)	Error Code
OYLT Type	0x00	0x00 - 0x0F	From E01 – E15
	0x01 - 0x0F	0x00 - 0x0F	Invalid
Daikin Type	0x00	0x00 - 0x0F	Invalid
	0x01	0x00 - 0x0F	From A1 - AF
	0x02	0x00 - 0x0F	From C1 - CF
	0x03	0x00 - 0x0F	From E1 - EF
	0x04	0x00 - 0x0F	From H1 - HF
	0x05	0x00 - 0x0F	From F1 - FF
	0x06	0x00 - 0x0F	From J1 - JF
	0x07	0x00 - 0x0F	From L1 - LF
	0x08	0x00 - 0x0F	From P1 - PF
	0x09	0x00 - 0x0F	From U1 - UF
	0x0A - 0x0F	0x00 - 0x0F	Invalid

\*\* Please refer to the mainboard manual for the meaning of each error code.

For example:

1. For OYLT Error Code type, If the receiving value of Error Code lower mapping value (A) is 0x00 and Error Code upper mapping value (B) is 0x0B.

Error Code upper mapping value (B) need to convert to decimal and hence 0x0B in hex is similar to 11 in decimal.

Error Code in OYLT type = A + B = “E” + “11” = **E11**

	<p>2. For Daikin Error Code type, If the receiving value of Error Code lower mapping value (A) is 0x02 and Error Code upper mapping value (B) is 0x03. Error Code upper mapping value (A) need to refer table above and hence 0x02 is similar to character “C”.</p> <p>Error Code in Daikin type = A + B = “C” + “3” = <b>C3</b></p>
32005	<p><b>Room Temperature Display</b></p> <div style="text-align: center;"> <span style="margin-right: 20px;">7</span> <span style="margin-right: 20px;">6</span> <span style="margin-right: 20px;">5</span> <span style="margin-right: 20px;">4</span> <span style="margin-right: 20px;">3</span> <span style="margin-right: 20px;">2</span> <span style="margin-right: 20px;">1</span> <span>0</span> </div> <div style="display: flex; align-items: center; justify-content: space-between;"> <div style="background-color: yellow; padding: 5px; border: 1px solid black;"> <div style="display: flex; align-items: center;"> <div style="background-color: yellow; padding: 2px 5px; font-size: 0.8em;">Signed bit</div> <div style="flex-grow: 1; border: 1px solid black; position: relative;"> <div style="position: absolute; left: 5px; top: -5px;">(MSB)</div> <div style="position: absolute; right: 5px; top: -5px;">A</div> <div style="position: absolute; right: 5px; bottom: -5px;">(LSB)</div> </div> </div> </div> <div style="margin-left: 10px; text-align: right;">       Lower Higher     </div> </div> <div style="text-align: center; margin-top: 5px;"> <span style="margin-right: 20px;">15</span> <span style="margin-right: 20px;">14</span> <span style="margin-right: 20px;">13</span> <span style="margin-right: 20px;">12</span> <span style="margin-right: 20px;">11</span> <span style="margin-right: 20px;">10</span> <span style="margin-right: 20px;">9</span> <span>8</span> </div> <p>A) Room Temperature        * Temperature value in Decimal multiplies with 10. *Example:*

*If user want to turn ON the unit, set fan direction to 0 and fan volume to 5 (high), then the format of data should transmit as below.*

Slave ID	FC	Data Address (+40001 offset)	Value Written	checksum
01	06	07D0	5001	7487

*Transmission of Preset Single Register - 01 06 07 D0 50 01 74 87*

42002

### Operation Mode

#### A) Operation Mode

Value	0	1	2	3	4	5	6	7
Mode	Fan	Heating	Cooling	Auto	-	-	-	Dry

*Example:*

*If user want to set operation mode to COOL mode, then the format of data should transmit as below.*

Slave ID	FC	Data Address (+40001 offset)	Value Written	checksum
01	06	07D1	0002	5946

*Transmission of Preset Single Register - 01 06 07 D1 00 02 59 46*

42003

### Set Temperature

#### A) Set Temperature

*\* Temperature value in Decimal multiplies with 10. Eg: 18°C x 10 = 180*

*Example:*

*If user want to set temperature to 26 °C, then the format of data should transmit as below.*

Slave ID	FC	Data Address (+40001 offset)	Value Written	checksum
01	06	07D2	0104	28D4

*Transmission of Preset Single Register - 01 06 07 D2 01 04 28 D4*

42010	<b>Disable Handset control</b>									
	7	6	5	4	3	2	1	0		
							B	A	Lower Higher	
	15	14	13	12	11	10	9	8		
	A) Disable wired handset/panel 0: OFF 1: ON									
	B) Disable wireless handset 0: OFF 1: ON									

42011	<b>Force Valve Off</b>									
	7	6	5	4	3	2	1	0		
							A		Lower	
	15	14	13	12	11	10	9	8		
	A) Force Valve Off 0: Normal Operation 1: Force off									

#### \*Preset Multiple Register

If user want to turn ON the unit, set fan direction to 0, fan volume to 5 (high), operation mode to COOL mode and set temperature to 26 °C, then the format of data should transmit as below.

Slave ID	FC	Starting Address (+40001 offset)	No. of registers	No. of data bytes	Value to write in 42001	Value to write in 42002	Value to write in 42003	checksum
01	10	07D0	0003	06	5001	0002	0104	685E

Transmission of Preset Multiple Register - 01 10 07 D0 00 03 06 50 01 00 02 01 04 68 5E
